PROFESSIONAL SUMMARY

DevOps Engineer with **3+ years of experience** in designing and implementing **CI/CD, DevSecOps, cloud infrastructure, containerization, Kubernetes, Infrastructure as Code, and observability** across AWS and Azure. Hands-on experience with **GitLab CI/CD, Azure DevOps, GitHub Actions, Docker, Kubernetes, Helm, Terraform, SAST, Checkmarx, ELK, Grafana, and Prometheus**. Experienced in automating deployments for Angular, React, .NET, Python, and Django applications, troubleshooting complex infrastructure issues, and partnering with development teams to deliver secure and reliable cloud-native solutions.

TECHNICAL SKILLS

Cloud: AWS (EC2, S3, RDS, IAM, VPC, Route 53, CloudWatch, SNS, Auto Scaling, Load Balancing) — Azure (Web Apps, Storage Accounts, AI Foundry, Key Vault, SQL, Virtual Machines, AKS)

CI/CD: GitLab CI/CD, Azure DevOps, GitHub Actions.

DevSecOps: SAST, Checkmarx, Security Scanning, Secret Detection, Code Quality, Secure CI/CD

Containers & Orchestration: Docker, Kubernetes, Helm, Docker Compose

Infrastructure as Code: Terraform

Monitoring & Observability: Elasticsearch, Logstash, Filebeat, Metricbeat, Grafana

Scripting & Automation: Python, Shell Scripting

PROFESSIONAL EXPERIENCE

TECHWAVE Consulting India Pvt. Ltd.

April 2023 – Present

Software Engineer – DevOps

India

Data & Application Modernization

- Owned end-to-end DevOps activities as the primary DevOps engineer during the early project phase, setting up **GitLab** Repositories, designing **CI/CD, containerization, infrastructure, deployment, and monitoring** solutions.
- Built **GitLab CI/CD pipelines from scratch** for application build, testing, security validation, Docker image creation, approvals, and environment-specific deployments across Dev, QA, and higher environments.
- Integrated **SAST and Checkmarx** into CI/CD pipelines for automated source-code security analysis, vulnerability detection, and security reporting.
- Created and optimized **Dockerfiles for Angular, .NET, Python** and deployed containers on Azure VMs and Kubernetes using **Helm**.
- Designed and implemented centralized observability using **ELK Stack and Grafana**, configuring Filebeat, Logstash, Metricbeat, Elasticsearch, and Grafana for application logs, VM metrics, and infrastructure monitoring.
- Troubleshoot CI/CD, Docker, Kubernetes, Python runtime, infrastructure, and deployment issues; collaborated with developers on **12-factor application practices**, configuration management, and cloud-native deployment standards.

AI-Powered Banking Application

- Designed and implemented **Azure DevOps CI/CD pipelines** for React UI and Django backend applications across **Dev, UAT, and Production**, including linting, security checks, builds, and deployments.
- Provisioned and managed Azure infrastructure including **Azure Web Apps, Storage Accounts, Azure AI Foundry, Key Vault, Azure SQL Server, and SQL Databases**.
- Supported deployment of an AI workflow using **Whisper AI for voice-to-text** and an OpenAI model hosted through **Azure AI Foundry** to generate reports from customer loan requirements.

Healthcare Platform

- Supported and enhanced a healthcare platform providing **electronic visit verification (EVV), patient care coordination, claims management, and HIPAA-compliant operations**.
- Implemented and managed **GitHub Actions CI/CD pipelines** for automated code integration, testing, quality checks, release workflows, and application deployments.
- Automated operational tasks using **Python and Bash**, including linting, source-code cherry-picking, production release reporting, and deployment-related workflows.
- Managed AWS infrastructure including **EC2, S3, RDS, IAM, VPC, Route 53, CloudWatch, SNS, Auto Scaling, and Load Balancing**.
- Deployed and managed containerized workloads using **Docker and Kubernetes**, ensuring scalable and reliable application delivery across cloud environments.
- Implemented monitoring and troubleshooting using **Prometheus, Grafana, ELK Stack**

AWARD

Best Performer Award – TECHWAVE Consulting India Pvt. Ltd.

Recognized for proactive ownership, rapid learning, problem-solving, decision-making, and contribution to successful project delivery.

EDUCATION

JB Institute of Engineering and Technology

2019 – 2023

Bachelor of Technology in Information Technology; CGPA: 7.87
